Juggling Balls, Bouncing Balls & Beanbags

Stage Balls

The Stage Ball is hollow and made of a flexible PVC which gives the ball great grip, it's durable and washable and available in different sizes and UV reactive colors.

If you do not want to juggle, you can also just buy some stage balls for your dog to play with :-)

100mm size is designed specifically for contact juggling and available in two different weights.

SIL-X Balls

The SIL-X is the ultimate juggling ball. It's a soft stage ball with a very special feature which is the result of an intense research work: 1/3 of its internal volume is filled with a special LIQUID SILICONE. The barycentre is low and the ball remains super stable on high throws and easy for foot catches and head rolling/balancing.

The principle is similar to the Russian balls' although it's a very different ball. The LIQUID SILICONE, unlike any kind of grain, slides perfectly inside the ball so that even when the ball is thrown with a spin it doesn't wobble in the air.

Moreover the Silicone is injected through a very small hole allowing us to use an almost invisible plastic tapered pin as a plug. (Note to curious jugglers; although the plug can be extracted and is extremely hard to push into the ball, you should not force it inside otherwise you will not be able to

recuperate it). This special LIQUID SILICONE is totally non-toxic (normally used in the food industry as a lubricant), and therefore totally safe.

The outer shell of the ball is rotary moulded much like our stage balls with a deep set hole that holds the “invisible plug” firmly in place. This is undoubtedly the most advanced juggling ball on the market today!

Designed, engineered and produced by the same team that brought you the indisputably top of the range PX3 juggling clubs. The 67 mm version is normally recommended for big numbers.

IMPLOSION

Fantastic evolution of our most famous SIL-X, the IMPLOSION has already conquered the hearts of thousands of jugglers around the world. The transparent rotary moulded shell, even softer and more elastic than classic SIL-X shell, shows the special LIQUID SILICONE and its stabilizing action that makes it so easy to control. The colored versions are all beautifully UV REACTIVE.

The 300 gr , 100 mm version is specifically designed for contact juggling.

CLUBS

Prima:

This is the first one piece juggling club from Play, another excellent prop!

One Piece Clubs are generally designed as an entry level product. They feature no decoration, a one-piece design and are extremely durable. What separates the PRIMA club from other entry level clubs is it's appeal to seasoned jugglers. The club features a very unique soft flex body, which allows for tricks that simply can't be done with other clubs one the market.

Professional jugglers have found this club to be a great addition to their collection of juggling props. Thanks to its perfect weight and balance PRIMA is the perfect club for those who are approaching club juggling.

Vegas:

The VEGAS is the decorated version of our SIRIUS.

It's the only club in the world with an innovative vacuum metal spraying decoration. This special coating is much more durable than any other sticker and doesn't add any extra weight to the club making it a professional prop for great performances. The translucent body shows the indestructible PX3 technology inside. Flash them in your gym to feel like you're always on stage! Although the VEGAS decoration is very resistant we recommend to use these clubs indoor or on stage to prevent scratches and keep their shiny look. PX3 VEGAS is the choice of many of the worlds best performers!
